

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

"There, Little Girl, Don't Cry!"

She had broken her heart—the same little girl who had broken her doll so many, many years before—and Riley's words of cheer and comfort, "There, little girl, don't cry!" tell, at once, what Riley has meant to the world.

His is the great, warm heart we turn to in trouble. His is the spirit that brings joy and comfort. The strong soul that could bear the troubles of a world, and never flinch under his own. A home which has no Riley is a house without flowers.

JAMES WHITCOMB RILEY

Few cold statues are built for him, but magnificent monuments that distribute goodness and gladness as he distributes them in his stories and story poems. They are building playgrounds and hospitals in his memory. And in his memory, too, we have made a beautiful set of his work—the work that to your soul is as a window to a house.

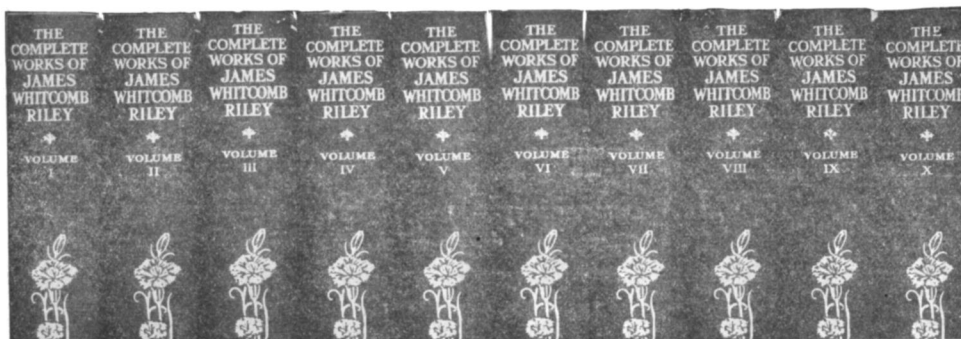

His Heirs Desire Only a Small Royalty

The heirs of James Whitcomb Riley came to us, as the publishers of Mark Twain, and said that they would be glad to reduce their royalty, so that we could place his works in the homes of all those who loved him. So we are able to make this complete set of all Riley's works, in 10 volumes, containing over 1,000 titles—for the present—at a price we can pass on to you. Only one edition of Riley's complete works has

been made up to now—and that sold from \$125 to \$1,750 a set. Yet you can have your set for less than one-fifth the lowest price made before. And they are full of beautiful illustrations by Howard Chandler Christy and others—some in full color—some in two colors—and some in black and white. The generosity of the Riley heirs and the resources of Harper & Brothers give you a rare opportunity.

Don't Miss it. Send the Coupon Without Money for Your Set on Approval To-day

HARPER & BROTHERS - - ESTABLISHED 1817

Harper & Brothers H.S.J.-1-19

45 Franklin Square, New York

Please send me the complete works of *James Whitcomb Riley*, in 10 volumes, bound in rich cloth, stamped in gold, fully illustrated by Howard Chandler Christy and Ethel Franklin Betts. I may keep this set for 10 days for examination and return it to you, at your expense, if I do not want it. If I keep the books I will remit \$1.50 a month for 13 months.

LAKE'S GENERAL SCIENCE

An Appreciation
By Dr. A. E. Winship

"This textbook of science is a marvel of condensation, and at the same time is as clear as a mountain brook. It covers the earth and the air and animals and man and almost everything that one might wish to know about the world in which he lives. To be acquainted with it is a liberal education. And yet any average student in the junior high or high school should not find any difficulty in mastering it. Mr. Lake has produced a book which should be introduced into all our schools. And not the least value of this book will be found in its attractive and illuminating illustrations."

The New International Encyclopædia

Second Edition; Just Completed

The American Library Association, made up of all the great librarians of the country, recently published a volume entitled "A. L. A. Guide to the Study and Use of Reference Books."

In the Guide they discuss the various encyclopaedias and of the Second Edition of The New International Encyclopædia they say:

"This is an encyclopædia of the best modern type, with adequate and authoritative articles, good illustrations and excellent and very useful bibliographies. It is the most frequently useful of all encyclopaedias in English."

Send in the Coupon. We'll Send the Book

We are confident you will at once decide to give The New International first place in your library and to that end we will tell you of the easy way in which you may make it yours.

Hackeling Tellurian

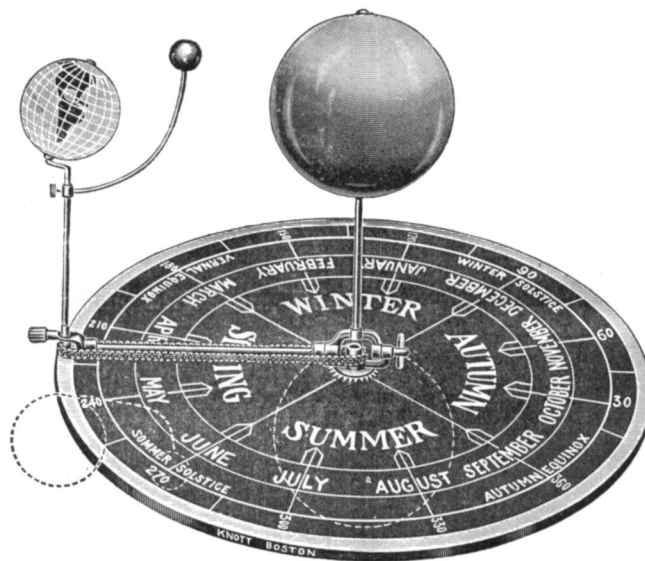

No. 49-90

Invented by the Late Dr. Herman A. Hackeling

THE object of the Hackeling Tellurian is to provide the student and teacher of Physical Geography or Astronomy with a working model which will demonstrate the axial rotations of the Earth and Moon, their combined revolution about the Sun, and the important phenomena which result from these motions.

APPROVED BY NEW YORK CITY BOARD OF SUPERINTENDENTS

Patent No. 858,977, Issued July 2, 1907

THE sun is represented by the large central, gilded sphere about which the earth-moon system can rotate by means of the horizontal arm close to the base. The wire which acts as rotation axis of the earth is bent to the proper angle from the vertical ($23^{\circ}.5$) and is inserted into a slot at the top of the rod supporting the earth. The moon can be moved up and down upon, and independently rotated about this rod. The base shows the position of the earth corresponding to the different months and seasons of the year. The positions of the earth at the time of the vernal and autumnal equinoxes and the summer and winter solstices are also given. The outside ring of numbers gives the angular deviation of any position of the earth from the autumnal equinox or the apparent deviation of the sun from the vernal equinox.

For compactness in transportation and storage, the entire system of globes can be rotated into a horizontal position by simply loosening the thumb-nut at the center of the base.

A NEW MODERN HISTORY

We have just published a new text-book in modern European history that stands alone in these features:

- (1) Adaptation in style and method of presentation to the capacity and interest of the second-year high school student.
- (2) Socialized history—the story of the progress and development of the peoples, with more emphasis on social and economic history than in other text-books.
- (3) Fresh treatment from the present point of view, which has changed even within a few months.

MODERN EUROPEAN CIVILIZATION

By R. L. ASHLEY

AUTHOR OF "EARLY EUROPEAN CIVILIZATION"

This new text-book, by a high school teacher of long experience and a leader in secondary school education, fits best the new high school situation. The author knew in detail the requirements of a high school text-book in this subject and knew how to meet them. If you want a text-book that is not only reliable and up-to-date, but also practical and teachable, you will find it in Ashley's *Modern European Civilization*.

The Ashley Series was adopted (Dec. 20) for exclusive use in all the high schools of Texas.

THE MACMILLAN COMPANY

BUILDERS OF DEMOCRACY

By EDWIN GREENLAW

Kenan Professor of English in the University of North Carolina

Cloth 347 Pages \$0.72

In this book Professor Greenlaw has made a text for Seventh and Eighth Grade pupils that furnishes a stimulating course of "Propaganda" for good citizenship---teaching a conception of patriotism that expresses itself in *conduct* rather than *emotion*.

The author has woven a series of poems and prose selections into a connected and dramatic story that traces the slow development of free government from its earliest beginnings in England to its highest expression in America today.

Study helps—stimulating questions and a complete glossary—make the book teachable

Write for detailed information or an examination copy.
